JIM-BUOY®

LIGHTHOUSE BUOYS

A portable, miniature lighthouse on land or sea! Visible for up to 1 mile utilizing the Jim Buoy No. 9000 Light. Available with tough, vinyl coated foam float for use in water or may be secured on land. Easy assembly.

(A) Model #9000-4-4' tall, 1 piece construction, ship wt. 4 lbs., single pack.

(B) Model #9000-6-6' tall, 2 piece construction, ship wt. 4 lbs., single pack. Secure to a depth of 15" for land use.

(C) Model #9000-12-12' tall, 3 piece construction, ship. wt. 5 lbs., single pack. Secure to a depth of 18" for land use.

HOW IT WORKS-

All functions are electronically controlled by 3 Alkaline "D" cell batteries (batteries not included), remaining off during daylight and automatically turning on at night. On flashing models, the bright, pulsating light flashes 40 milliseconds per flash and 30 flashes per minute (Available 60 flashes per minute) and is visible for up to 1 mile (Model No.). 9000-X & 9000-XSB. Both flashing models are guaranteed from date of purchase to last a year without battery or bulb change! Steady Burn Model No. 9000-XSB will last up to 1-1/2 months without a battery or bulb change.

SUPERIOR DESIGN FEATURES-

It's a handy lighting system that is totally water-proof. It features a rugged, plastic housing with an almost indestructible polycarbonate lens and is impervious to the most severe weather conditions, salt water corrosion and requires little or no maintenance under normal use.

Lights Available for Buoys and Floats—Most Jim-Buoy Channel Markers, River/Mooring Buoys and Rope Floats may be ordered with any of the No. 9000 Series Lights.

U.S. Coast Guard Compliant—Models No. 9000-X and No. 9000-XSB comply with USCG Rule 88.15 for dredge and pipeline applications (USCG Rule 24 for towing or pushing and USCG Rule 22).

Convenient Size and Low Cost—Now it's possible to place lights in many areas that in the past might have been impractical; here are just a few ideas we have...

- Commercial Fishing—Long-Liners, Crab Pots, Lobster Traps, etc.
- Aquaculture Ponds—Amber preferred.
- Marine Industry/Boating—Buoys, Barriers, Rope Floats, etc.
- Highway Maintenance/Safety—Barricades, Traffic Cones, etc.
- Home, Farm & Auto—Roadway Guide Lights, Garden Areas, Outbuildings, Emergency Flare/Signal Devices, etc.
