Filament Designations

Filament designations consist of a letter or letters to indicate how the wire is coiled, and an arbitrary number sometimes followed by a letter to indicate the arrangement of the filament on the supports. Prefix letters include C (coil) – wire is wound into a helical coil or it may be deeply fluted; CC (coiled coil) – wire is wound into a helical coil and this coiled wire is again wound into a helical coil. Some of the more commonly used types of filament arrangements are illustrated.

LIGHT BULBS

Bulb Designations

Bulbs are identified by a letter or letters followed by a number. This letter indicates the shape of the bulb, and the number indicates the diameter of the bulb in eighths of an inch. EXAMPLE: "S-8" indicates 'S' bulb having a diameter of 8/8ths or approximately 1 inch.
